

INSTRUCTIONS FOR INSTALLING  
VENDAPIN LLC MODEL 1100 & 1500 SERIES VENDOR

1. Remove all packing from the inside of the Model 1100 or 1500 Series Vendor.

2. Remove the keys from the power supply cord to open the cabinet.
3. Unbox and bolt the Model 1500 Series Vendor to a solid wall near an electrical 110~120 volt AC grounded outlet utilizing the key style hole mounts on the rear of the cabinet.
4. Plug in the power cord and allow 1 minute for the cellular connection to the InOne servers.  
Open the Model 1500 cabinet door by turning the 2 keys 90 degrees, then lift up on the side of the shelves in an upper sweep latching each shelf into position. Load your product on the 1 inch height shelves.

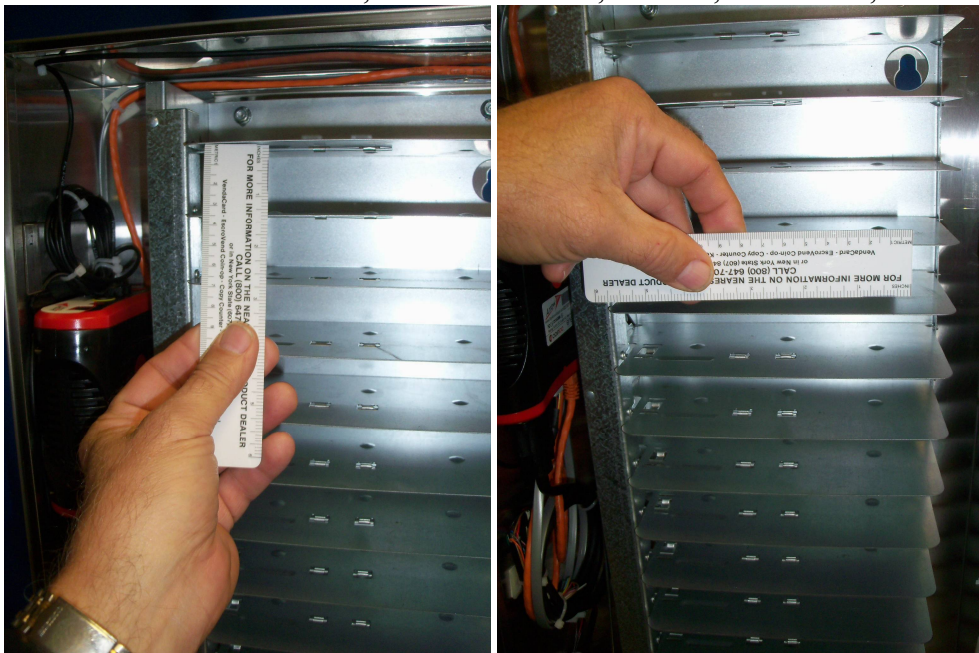

Next test the Model 1500 for a vend by swiping a credit card or the Free Vend Card.

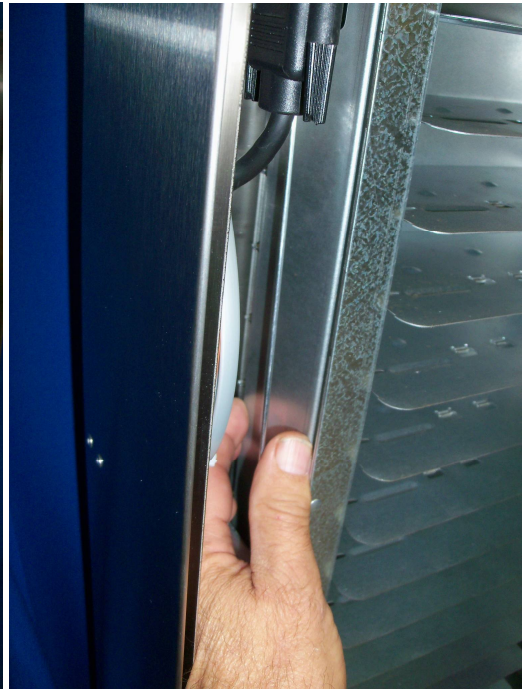

5. Note the Verizon Cellular Antenna is mounted inside the cabinet & secured by a 90 degree cam lock.

6. Note that you can load products with a 1 inch thickness x 6 inch length x 5 inches in depth. Example would be a CD or DVD, USB Flash Drive, Camera, Cell Phone, etc.

7. The shelves can be dropped by moving the side bar back and forth on the left side of the machine.

### 8. Loading DVD's or CD's
